

more than 1 string in one go with either a guitar pick or your right index fingernail. When we strum, we make more than one string vibrate and produce a sound. The pattern for strumming however, is difficult to teach as it is often as natural as doing headbang, dancing to a beat, or tapping on the desk while listening to some music.

The right hand skills will be taught by your instructor, Mr. Benedict de Jesus face-to-face using an actual guitar. For reviewing, you may use the following metronome app.
